

A man in a light blue button-down shirt is working on a complex mechanical gripper. The gripper is made of silver metal and has two fingers. It is connected to a black motor with an orange wire. The man is holding the gripper with both hands, and his face is partially visible in the upper right corner. The background is blurred, suggesting a workshop or laboratory setting.

# Brand Guidelines

This manual gathers the basic tools to correctly use the Skills.move brand in all its possibilities.

This way we improve the identification and recognition of Skills.move.

1. Basic standards
2. Color palette
3. Photographic style
5. Icons

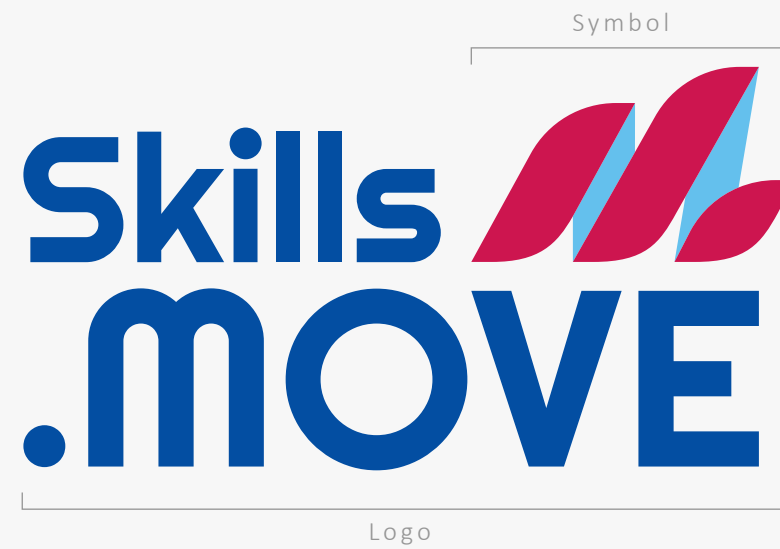

# 1. Basic standards

## **1.1** **Logo composition** Symbol

The graphic symbol can be used as a support resource (independently of the logo) for the parts detailed in this manual.

## 1.2 Logo composition Main version

## 1.3 Logo composition

### Security zone

In order for the logotype to always maintain its legibility and not conflict with other elements, a free space must be left around it.

The minimum established is equal to the height of the capital letter "s" in the logo.

## 1.4 Logo composition Minimum size

The minimum size of the logo ensures its legibility in the different formats and supports.

In digital the minimum size will be 110px.

## 1.5 Logo composition Correct uses

### Full Color

The full colour logo is the preferred version on all materials and communications.

### Reversed

This logo is used when the logo sits upon any of the colours from within the Core or Primary Colour Palettes.

### Single Color

The single colour version of the logo should only be used when the full color version of the logo cannot be applied.

## 1.5 Logo composition Correct uses

The logo on image will be in white color and can be placed wherever it is convenient according to the image, always respecting the security zone when it is placed at the edge of the image.

If necessary, a shadow effect can be added behind the logo to allow its legibility.

We will use the color version as long as the image has clear backgrounds that allow it to be displayed well.

## 1.6 Logo composition

### Incorrect uses

Any modification of the logo causes it to lose meaning and diminishes its impact. Under no circumstances may it be redrawn, reinterpreted or altered in any way.

#### Symbol

Do not move the symbol from the logo composition

#### Form

Do not recreate, rewrite, redraw or modify the proportions of the logo.

## 1.6 Logo composition

### Incorrect uses

Any modification of the logo causes it to lose meaning and diminishes its impact. Under no circumstances may it be redrawn, reinterpreted or altered in any way.

Do not place our logo on backgrounds that limit legibility, on faces or legibility, on faces or on backgrounds with high-contrast high contrast elements.

## 1.7 Logo composition Symbol uses

Sometimes we can use the symbol as a watermark on images.

It can also be used as background of digital media in which texts can be placed on top. For these texts to be displayed correctly, the opacity of the symbol must be a maximum of 10%.

We can use the color or white version as appropriate.

## 2. Color palette

## 2.1 Main colors

CMYK 13 99 51 4
