

Innovate Together

Building on the success of the past edition

Xavier Baillard, Inno2Market Director

First edition in a few key figures

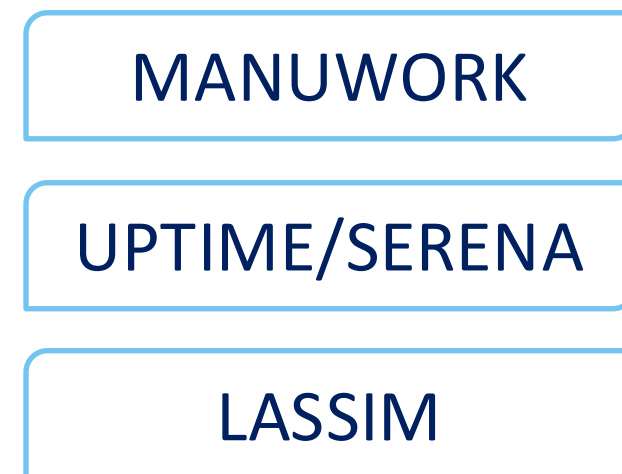

13

applications received

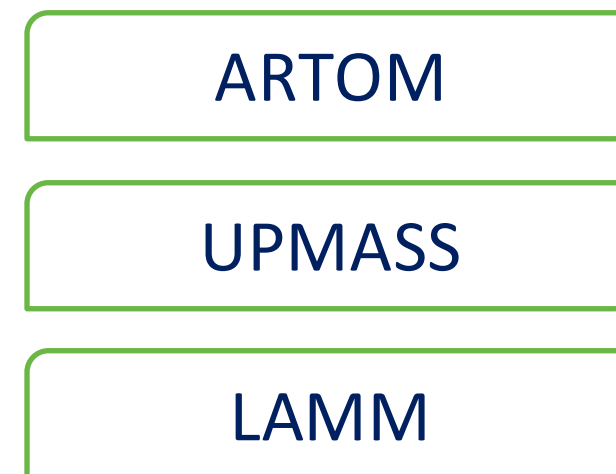

3

consortia selected

FoF projects

Innovate Together projects

€1.1 million

EIT funding allocated

> €500,000

cumulated sales during first year

ARTOM

AR for Training, Operation and Maintenance

Challenges addressed

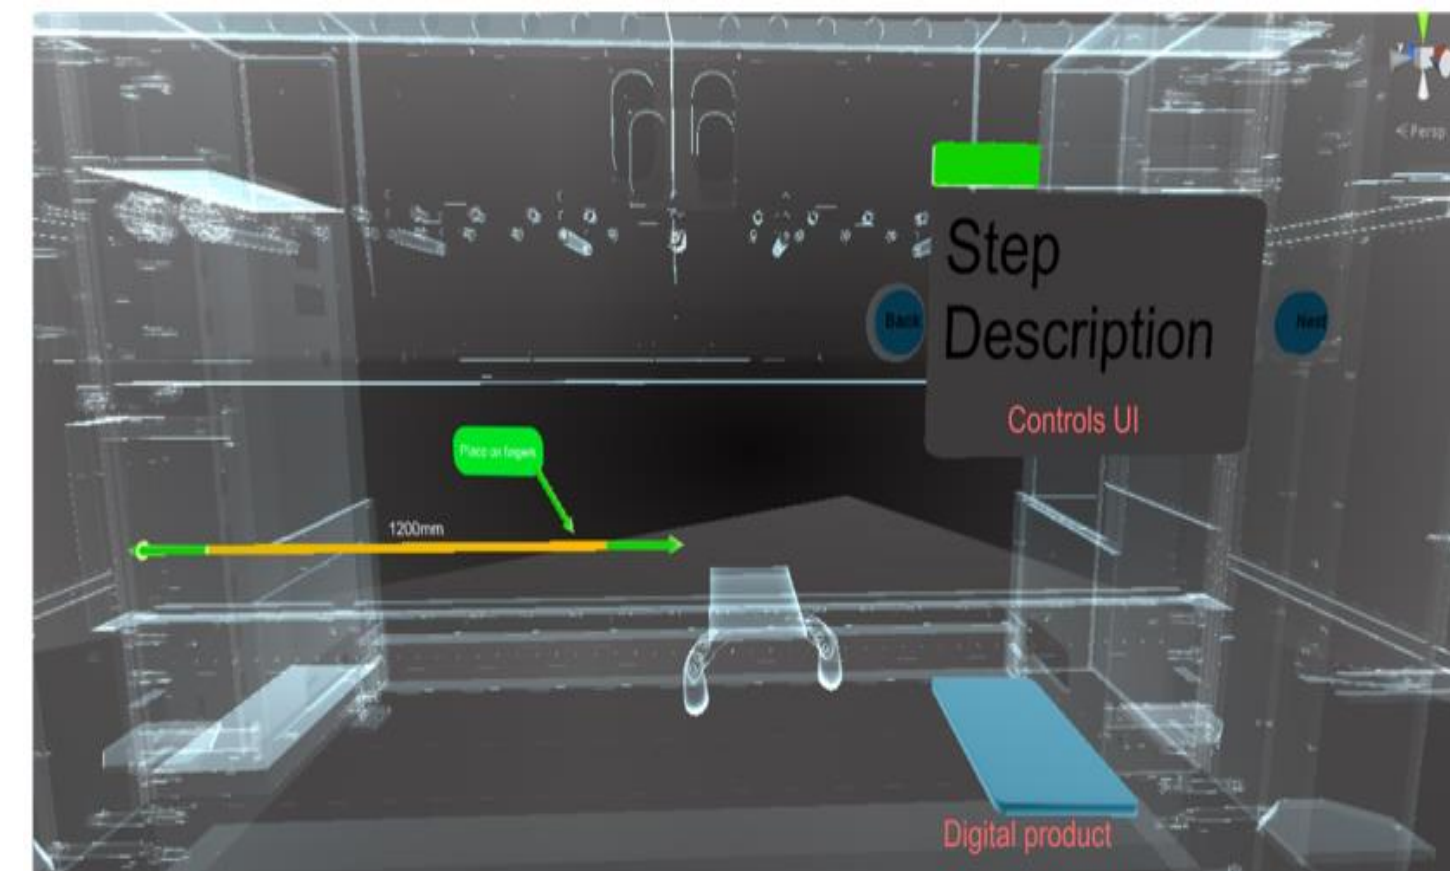

- Safety incidents on operation of metal forming machine
- Loss of productivity due to downtime of machines during repair

Innovation supported

- Augmented Reality solution supporting the whole life cycle of human interaction with the machine from training, to operation and maintenance.

Objectives

- Process quality improvement by 30%
- Bring repair time from 2-5 days to a few hours

UPMASS

Unified Predictive Maintenance & Scheduling System

Challenges addressed

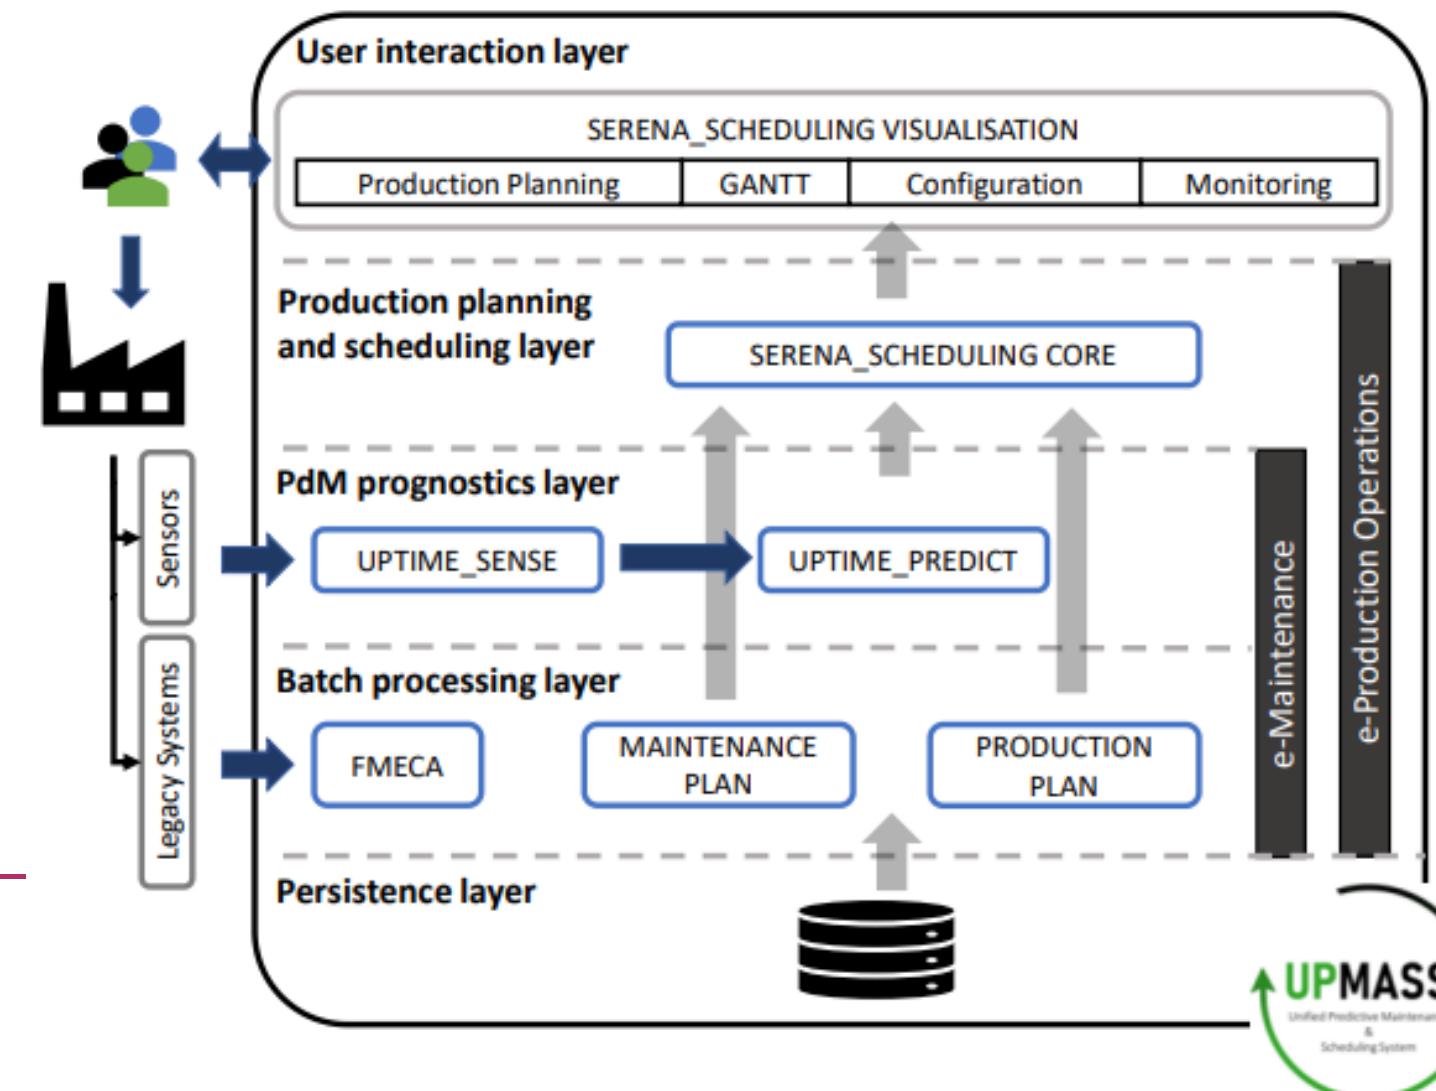

- Non-optimal use of equipment
- Downtime during maintenance operations

Innovation supported

- Predictive maintenance and scheduling product to support manufacturers in their maintenance activities

Objectives

- Improve the availability of production assets
- Optimise planning of maintenance activities

LAMM

Large Additive Manufacturing Machine

Filomeno MARTINA

CEO & Co-founder
